

**SURFACE MOUNT RF  
COAXIAL CONNECTORS**

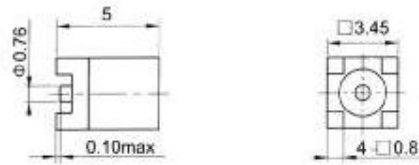

Surface mount connectors are attached to the circuit board by soldering but not in the same fashion as the through hole mount of the PCB connector. These units are attached to pads on the board by means of a solder reflow process. This eliminates the need for drilled holes and reduces the overall installation. CERNEXWAVE offers surface mount connectors in series SMA, SMB, SMC, MCX, SSMB, and MMCX.

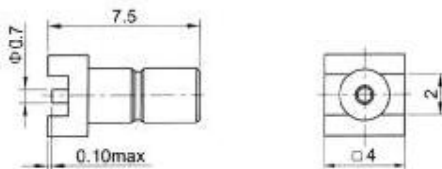

# SURFACE MOUNT SERIES
